Faceplate PlusTM

The large faceplate isn't large enough for more information. This second plate makes up for this. It posts the kind remind to guests, as well as saves the space of the table in room.

Cord TrayTM

The tray has changed the traditional way of putting the coiled cord. We find a home for it. The unique cord tray makes the phone set tidy and prolong the use life of cord.

Guest Service KeysTM

Traditionally，people usually adopt the large capacitor to store the one-touch programmed number, but it's easy to lose the stored numbers after a longer time. Bittel new hotel guestroom phone adopts E2PROM combining software "One-Touch" memory programmed technology, the stored numbers are just like the numbers stored in the computer hard disk, never lose, with the powerful reliability. It's really the permanent memory keys.

ClockphoneTM

The Clockphone is designed to ensure the guests to acquaint the time freely. The accurate LED clock with the time-adjust by cloner in centralisation brings great convenience to hotel. The line powered technology supports the clock work well for long time and solves the problem of clock external power. The Clockphone has been becoming the new standard of the guestroom phone.
