One-

Touch Memory Key Programming: Software Programming

Box Dimension: 50 × 44.5 × 27(cm)

Package (set/carton): 10set/Carton

Double-Dial Pads™

You can make/answer a call by handset. In general, guestroom phone is dialed only through base unit, while the newest guestroom phone can be dialed either through base unit or through handset. Both base unit and handset has keypads, handset keypad is membrane, backlit and very convenient. It is the marking feature of the third generation hotel phone. Guest may make/answer call by the handset lying in bed like using cordless phone, unnecessary to put the handset back.

EZ Message Light™

"MWL with message retrieval function": Traditional voice mail service is very troublesome. Guest doesn't know how to use when MWL flashes. While our new MWL adopts patented technology of "light and key in one", guest touches and retrieves message when the red MWL flashes, very convenient, simple and quick.

Magic-Faceplate™

The unique membrane keypad is soft touch, back-lit, waterproof and easy to clean. The life of membrane keypad is much longer than the regular keypad.
